## Bernie Sanders

### WHY BERNIE?

#### EDUCATION REFORM

Bernie believes and has been slowly implementing during his time as a Senator a system of higher education that everyone can afford. Education is a right, not a privilege.

#### AMERICAN JOBS

Since 2001, more than 60,000 production lines have moved abroad. Bernie believes in taking direct actions against free trade agreements with China and other countries to tell corporations to create jobs here, not abroad.

#### INFRASTRUCTURE

America's infrastructure is crumbling. Bernie wants to help America with repairing our pot-hole riddled roads, to build efficient sewage systems. Overall, the improvements made will add American jobs to the workforce.

#### CAMPAIGN FINANCING

The Citizens United v. FEC Supreme Court decision was a detriment to the American Democracy. Bernie believes that any candidate who wants to race for office, should without being controlled or undermined by the wealthy and powerful.

#### CLIMATE CHANGE

Bernie will continue to study and implement sustainable energy resources. Transforming our energy system will not only protect our environment, but will create American job and reduce our dependence on foreign oil.
